

Partners in Grain would like to invite you to join our

Women's Agronomy Group (WAGs)

Our aim is to increase understanding of **general agronomy** (including terminology and why agronomic practices are undertaken) and **farming systems** in a dryland cropping situation.

Our group is open to all women in the Mungindi, Boomi, Thallon and Dirranbandi districts who would like to increase their knowledge of agronomy.

The information will be delivered by an agronomist at a basic level, but you can take it to whatever level you like. **This group is where you can ask those questions you've never been game to ask before!!**

The group will look like this:

- Run from 10.00am to 1.00pm (NSW time during daylight saving) and start with smoko (no lunch provided)
- We will meet approximately bi-monthly (meetings will be based around the crop cycle)
- We will meet on-farm and spend most of our time in the paddock
 - The information will be delivered by dynamic and interesting agronomists

Our first meeting will be on Tuesday the 23rd of March starting at 10.00am (NSW time), at Bruce Longworth's property – South Bunarba Weemelah

The day will cover:

- Fallow Management
- Crop Sequencing
- Gross Margins
- Soil Moisture
- An overview about last years crop

If you want to know more, or register your interest please don't hesitate to give Theresa Kunde (07 4625 9076) or Joanne Weir (02 6753 7390) a ring

Although Partners in Grain strives to run family friendly events, due to the nature of the environment in which we will be learning (on farm), mobile children (from toddler to school age) won't be able to join us. If you need help finding care for your littlelies let us know.
