

Testimonial for WebTEAM Australia by Liz Hill at [www.stgeorgeqld.com](http://www.stgeorgeqld.com)

Kate Schwager came to St.George as a guest speaker for a Woman in Business seminar facilitated by Emily Martin of Agrigate in early 2005.

When Kate spoke about her concept of a small town's website and the WeeWaa site I realised the possibilities of a St.George site. A website for the town, community groups, tourists and business. Connecting all the community together in one place like a hub. Newbies to town can research the area they are coming to, Travellers wanting places to visit and School children researching projects. Organisations can promote and give their contact details, everyone can find out about local sporting and community groups. Promotion of Local services and Businesses, allowing them to advertise on the net, supporting local groups by placing a banner over the community page. And even when you go travelling you can show people where you live.

A few months later when I rang Kate to see if any of the local women with "computer skills" had taken up the idea, she was very encouraging and said "Even someone with limited computer skills could use the small town's suite!"

And so I began the journey of developing a website for StGeorge. Kate and Ruth Quigley have been there every step of the way with me. The suite was very user friendly and learning the steps in developing a website, loading pictures and pasting information has not been arduous. Kate was very patient and able to lead me step by step thru the process. Being a busy person she was not always available 24/7, however I found the e-mail and msn chat worked really well as communication tools.

Having already developed their own small town sites with Trangie and WeeWaa, the knowledge Ruth and Kate gave to me was very relevant, The business package has also been particularly helpful as I developed my relationships within the town and launched the website in June 2006. Thank you Kate for believing in me and for providing this wonderful opportunity to establish my own business – one I could run from the farm.

While on the Internet - with a click - [www.stgeorgeqld.com](http://www.stgeorgeqld.com) bounces to life.

**Of course if you know of anyone who is  
passionate about their town and would like to  
promote it using a sustainable concept and running  
it as a business let them know about the package.  
There is a brochure on the website below**
